

**Note -**  
 All existing below ground surface drainage pipework to be removed as a result of the underpinning works. New drainage routes, as shown, to comprise 100mm clay pipework, laid to falls, connecting into existing Cemetery system to south. Allowance to be made for roddable gullies (clay with CI covers) below each downpipe (except RWP1 & RWP5) and inset into stone channels as shown, and rodding eyes at changes in direction (as shown 'RE').
